BODY TREATMENT

Body massage is a form of comprehensive health care that is popular and widely used in the world. This is a gentle physical contact method, often combined with the use of essential oils, to affect the muscles and skin of the entire human body

The main goal of body massage is to stimulate acupressure points on the body, helping to improve blood circulation and reduce body stress and fatigue

During the long process of research and practice, Wabi sabi Spa has better understood the relationship between acupressure points on the body, and has since developed many Massage methods that can help heal injuries, reduce pain and mental balance.
